★ YOUR BEST FIT

New Zealand · Skilled Migrant Category

You are a strong candidate with excellent credentials—master's degree, 6 years of software engineering experience, and solid English proficiency—positioning you well for skilled migration. Your best opportunity is New Zealand's Skilled Migrant Category (score 78), followed closely by Canada's PNP stream (score 77), both of which recognise your in-demand tech skills and experience. Without a job offer or settlement funds declared, focusing on points-based pathways in these two countries is your clearest route forward.
