

FORUM BHANUSHALI MSRA, M.Sc.

Clinical Operations Leader | Global Clinical Trial Management | Operational Excellence

fbhanushali2@gmail.com | +1 (857) 757-0966 | Boston, MA | [LinkedIn](#) | [PETAL Consortium](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Trial management professional with 8 years of experience leading global Phase I–III oncology, rare disease, and precision medicine clinical trials from feasibility and study startup through close-out. Expertise in operational strategy, study planning, cross functional leadership, vendor oversight, study forecasting, budget management, risk mitigation, and global study execution across biotech, CRO, and academic settings.

CORE COMPETENCIES

Enterprise Project Leadership: Portfolio management, project charters, business case development, work plans, timelines, risk mitigation strategy, implementation planning

Governance and Stakeholder Engagement: Institutional committee facilitation, governance structure design, steering committee leadership, stakeholder consensus building, executive communication

Strategic Planning and Organizational Change: Change impact assessment, technology adoption, process standardization, training and communication strategy

Data Analytics and Performance Improvement: Operational metrics, dashboards and scorecards, performance reporting, trend analysis, KPI review

Clinical Research Operations: Feasibility through closeout, CTMS and EDC systems, eTMF, regulatory submissions, FDA, NIH, OHRP, CMS, and ICH GCP

Systems: Medidata RAVE, Oracle InForm, REDCap, Veeva Vault, Smartsheet, Power BI, MS Office including Excel, PowerPoint, Word, and Teams

PROFESSIONAL EXPERIENCE

Senior Clinical Project Manager

July 2024 to Present

Brigham and Women's Hospital (Center for Clinical Investigation), Boston, MA

Therapeutic areas: Rare Diseases, Oncology

- Lead end-to-end global clinical trial execution for a global Phase II precision medicine rare disease consortium across 32 sites in 8 countries
- Lead feasibility, start-up, and site activation across 30 sites and 12 external vendors, reducing start-up timelines by 28% through standardized site selection, IRB/EC submissions, CTA negotiations, SIVs, and investigator trainings
- Oversee a \$6M global study budget, including study forecasting, RFP development, vendor selection, scope negotiation, scope negotiation and timeline planning, financial forecasting, invoice reconciliation, budget tracking, contract oversight, KPI reviews, and vendor performance management
- Exceed enrollment targets 6 months ahead of schedule by implementing site-specific recruitment strategies, expanding co-Investigator & referral networks, and developing patient recruitment materials
- Direct cross functional study teams across Clinical Operations, Regulatory Affairs, Data Management, Biostatistics, Laboratory Operations, CROs, vendors, investigators, and external collaborators to deliver study milestones on schedule and within budget
- Lead organizational change across a 30-site global program by standardizing operations through 25 SOPs, 5 manuals of operations, and eCRF completion guidelines, reducing data issues by 40%
- Design and implement centralized Risk-Based Remote Monitoring by developing KRIs and SDV workflows, improving protocol compliance by 53%
- Drive technology adoption by designing protocol specific EDC solutions including 50 CRFs, edit check specifications, and a central pathology database, implementing 450+ REDCap enhancements through 10 UAT cycles
- Develop study operational plans, monitoring plans, data review plans, study templates, operational trackers, and risk mitigation strategies supporting study startup through close-out.
- Manage 1,000+ biospecimen shipments, 350+ central pathology reviews, and 1,250+ HRQoL assessments across global study sites
- Manage site TMFs and sponsor eTMF, achieving 100% completeness and zero major inspection findings across the global program
- Establish governance frameworks for 7 committees supporting AI, genomics, pathology, and data-sharing initiatives, by developing charters, operational policies, decision-making framework, escalation pathways, and data access workflows
- Co-develop HOPE PTCL, the first global patient portal for mature T cell lymphoma, leading change management and adoption planning for a new patient facing technology

Clinical Biomarker Operations Co-op

January 2024 to June 2024

Moderna (Clinical Biomarkers), Cambridge, MA

Therapeutic area: Oncology

- Directed biomarker operations process optimization across 3 global Phase II oncology studies at a clinical stage biotech company, improving NGS quality control workflows
- Reduced biomarker data reconciliation time by 60% by optimizing data review processes across multiple clinical systems
- Designed a centralized biomarker data model integrating data from 8 source systems and 30+ biomarkers, automating participant and sample tracking for 5 sample types including FFPE, PBMCs, whole blood, plasma, and serum
- Managed the end-to-end biomarker sample lifecycle within the Biobank and Laboratory Information Management System, maintaining regulatory compliance and end to end sample traceability
- Developed the Cross Functional Data Review Plan, standardizing biomarker data review across 5 teams
- Implemented Vendor Assessment Forms and audit mitigation plans across 16 external vendors, standardizing vendor oversight and quality documentation
- Integrated biomarker operational improvements into 4 platform level clinical workflows through cross functional collaboration

Clinical Trial Associate Intern

July 2023 to September 2023

Takeda Pharmaceuticals (Global Clinical Operations), Cambridge, MA

Therapeutic areas: Plasma Derived Therapies, Neuroscience

- Managed study start up and site activation across 3 global studies including 2 Phase II and 1 Phase III spanning 40+ sites in 5 countries, coordinating with Clinical Operations, CROs, and study teams
- Reviewed 20 Essential Document Regulatory Packages supporting regulatory submissions and site activation across global study sites
- Evaluated 25+ country specific informed consent forms across 5 countries, collaborating with Clinical Operations, Legal, Privacy, and external vendors to support global study activation
- Contributed to development and review of study protocols, CRFs, Clinical Operations Plans, Data Management Plans, Data Transfer Guidelines, and Clinical Study Report appendices
- Facilitated vendor financial reconciliation and study close out activities in collaboration with the Clinical Trial Manager and Vendor Operations
- Maintained the Trial Master File, 3 study storyboard trackers, and study specific SOP inventories for inspection readiness and cross functional document reviews
- Participated in Study Executive Team, protocol review, protocol amendments, investigator meetings, monitoring plan development, and cross functional operational planning

Clinical Data Manager

August 2020 to April 2022

Labcorp Drug Development, Bangalore, India

Therapeutic areas: Musculoskeletal, Dermatology

Sponsors: Alexion and Endo Pharmaceuticals

- Led end to end clinical data management across 6 global Phase II and III studies, delivering 2 database locks, 10 interim database freezes, multiple database migrations, and 13 protocol amendments while maintaining 100% on time database milestone delivery
- Mentored 10 Clinical Data Analysts, overseeing resource allocation, daily study activities, and standardized data review methodologies, reducing onboarding time by 26% and enabling consistent delivery across 6 concurrent global studies
- Developed Edit Check and Data Validation Specifications by transforming manual data review into automated edit check logic, reducing manual data queries by 60% and creating reusable validation logic adopted across subsequent study builds
- Developed 6 study specific eCRF Completion Guidelines aligned with CDASH standards, reducing protocol deviations related to data collection by 38% and improving consistency of downstream SDTM mapping across global studies
- Executed User Acceptance Testing strategies and test scripts across 8 database releases, identifying critical system defects before production deployment and reducing post release discrepancies by 30%
- Led weekly cross functional Data Review Meetings, directing resolution of vendor data and SAE reconciliation, laboratory discrepancies, MedDRA and WHODrug coding queries, issue logs, and query management with sponsors, medical monitors, CRAs, and vendors, reducing database cleaning timelines by 40%
- Developed 12 executive dashboards, clean patient trackers, study metrics, and status reports for risk based operational monitoring of enrollment, query aging, protocol deviations, site performance, and data quality trends, reducing overdue queries by 47% while maintaining eTMF documentation

Clinical Data Manager

October 2018 to July 2020

Tata Consultancy Services, Mumbai, India

Therapeutic areas: Oncology, Respiratory Diseases

Sponsor: GlaxoSmithKline

- Managed a team of 5 Clinical Data Analysts supporting 2 Phase III Oncology and 2 Phase II Respiratory studies in the conduct and maintenance phases, delivering 3 database locks, 9 protocol amendments, and 7 on time study milestones
- Directed day to day clinical data operations, overseeing query management, data review, issue log resolution, vendor data management for pharmacogenomic and biomarker datasets, SAS listings, and protocol deviation tracking, reducing issue resolution timelines by 48%
- Developed protocol driven Edit Check Specifications, Data Validation Specifications, and eCRF Completion Guidelines, reducing manual queries by 39%, protocol deviations by 28%, and postproduction database change requests by 55%
- Executed User Acceptance Testing across 3 database releases, identifying critical issues before go live and improving discrepancy resolution by 20%
- Served as the primary point of contact for data issue resolution, vendor data management, protocol deviation reviews, SAE reconciliation, SAS checks, and study metrics, reducing outstanding data issues by 60% prior to interim analyses and database lock
- Developed weekly study metrics, operational dashboards, and data listings for sponsor governance and study team meetings, reducing overdue queries by 26% while supporting centralized monitoring and DSMB reporting
- Led weekly cross functional meetings with sponsors, study teams, and external stakeholders, driving action item resolution and reducing open operational risks across concurrent studies
- Mentored 5 Clinical Data Analysts and new team members on data review, query management, manual listings, SAS checks, vendor data reconciliation, protocol deviation management, SAE reconciliation, and ALCOA CCEA, CDISC, CDASH, and SDTM standards, improving review consistency across the team

EDUCATION

MS in Regulatory Affairs, Northeastern University, Boston, MA CGPA 3.96 of 4.0 Sep 2022 to July 2024

M.Sc. in Biochemical Technology, Madurai Kamaraj University, India CGPA 8.3 of 10 May 2018

B.Sc. in Biotechnology and Biochemistry, University of Mumbai, India CGPA 7.0 of 7.0 May 2016

CERTIFICATIONS

- GCP Certified
- PMP Certification, in progress, exam scheduled September 2026

PUBLICATIONS AND PRESENTATIONS

- Contributing author, Clinical outcomes of mature T and NK cell lymphomas in hepatitis B virus positive individuals, results from the PETAL Global Consortium. Leukemia and Lymphoma. 2026
- Contributing author, Forecasting optimal treatments in relapsed or refractory mature T and NK cell lymphomas, a global PETAL Consortium study. British Journal of Haematology. 2025
- Contributing author, Global outcomes and prognosis for relapsed or refractory mature T cell and NK cell lymphomas, results from the PETAL Consortium. Blood Advances. 2025
- Invited speaker, PETAL Consortium initiatives at ASH 2024, ASH 2025, and TCLF 2025, TCLF 2026
- Invited speaker, 9th India Probiotic Symposium 2018, awarded the title of Young Investigator

ADDITIONAL REGULATORY AND COMPLIANCE EXPERTISE

Regulatory submissions including IRB, IND, NDA, and BLA. ICF development and review under HIPAA, GDPR, EMA, TGA, PMDA, and CDSCO. CTD dossier, target product profile, Investigator's Brochure, Clinical Study Reports, and 510k submissions. ICH GCP E3, E6, E8, and M4. 21 CFR Parts 11, 50, 54, and 56. cGxP. FDA expedited programs including Fast Track and Breakthrough Designation. ICH GCP, NIH, OHRP and CMS regulations

TECHNICAL SKILLS

EDC and CTMS: Medidata RAVE, Oracle InForm, REDCap.
eTMF: Veeva Vault Clinical and Quality, iRIS.
EMR/EHR/Other: Epic, OnCore, Insight, OncPro
Process and Data Tools: Smartsheet, Power BI, SharePoint, MS Office including Excel, Word, Outlook, Teams, and PowerPoint, OneDrive, Adobe, SQL
AI Tools: Claude (co-work), Gemini, GPT-5.5, Perplexity, Grok, Google AI Studio, Notebook LLM
